Introduction to AiBiz

AiBiz is a web based business management application developed by Aixept Technologies. This solution is built to assist business managers to record and track their business activities. It provides an efficient means of creating records, generating reports and performing analysis. It is a flexible solution that gives business owners the opportunity to tailor their usage of the application to their business needs and peculiarities. With good use of the application, business managers will always understand the true picture of their business, get to know their market trend, track changes in stock, and perform other important business functions. To ensure controlled usage, the application provides functionality based access control to limit users access. Functions are assigned to users by the business managers / portal admin during user registration. The application url is <https://www.aibizglobal.com>.

What users say

Everything we do at Aixept is to ensure you have amazing technology tools that will increase your productivity and effectiveness. Find out what our customers have to say about using the AiBiz platform.

"AiBiz is a great application for business management. I have been using the application since 2016 and it has been of immense value to my business especially in the area of tracking debts and changes in stock."

-
Solomon

Noting Pass God Global Ventures
(Onitsha)

"To say the app is good would be an understatement. It is very good. It was as if it was tailored for the company,. Made the job simple and fun. I can login from anywhere I am and monitor what is going on in the office, respond to any customer who has one question or another. Everyone in the department is so happy. We say a big thank you to Aibizglobal. Please keep making it serve us better and better.

-
Management

MEYBIKS NIG. PUBLISHERS
(Owerri)

"This is the best accounting App that i have ever met. I can record all my business transactions and know the products that sale more and even generate e-receipt for my customers."

-
Emeka

Idyllic Laundry Services
(Lagos)

"The Application is very good and I have been using it to manage my business since March 2018.

-
Uche

UC DE MAXY ENT NIG
(Anambra)

What users say

“The AiBiz platform is really well thought out. It speaks to every ‘behind the scene’ need of a budding or established business. Paper work, which has been one of my most dreaded part of business has been made super easy and breezy, thanks to the AiBiz platform.”

-

Nwaka

Beauty Fragrance and Makeup Hub
(Lagos)

“ This app is simply awesome! Managing business is now more easier and more efficient! Accountability on point! Thanks a lot to the developer of this app!”

-

Kelvin (Lagos)

“ This app is super awesome. It allows me to record every single operation in my business including my personal expenses. And it generate records for every activity on the app. It personalized It's appearance to seem like it is my personal business app. This app helps me keep track of what is going on in my business across all the branches of my business. With it, I can now predict high sales period and I now understand the dynamics in my kind of business in different locations I love the app.”

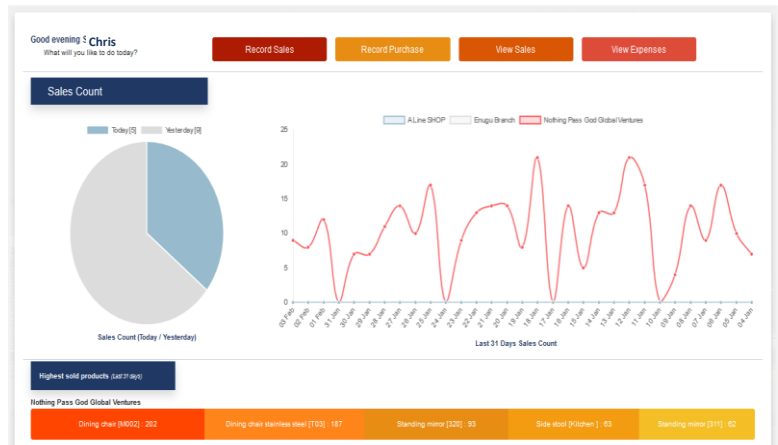

-

Emmanuella (Port Harcourt)

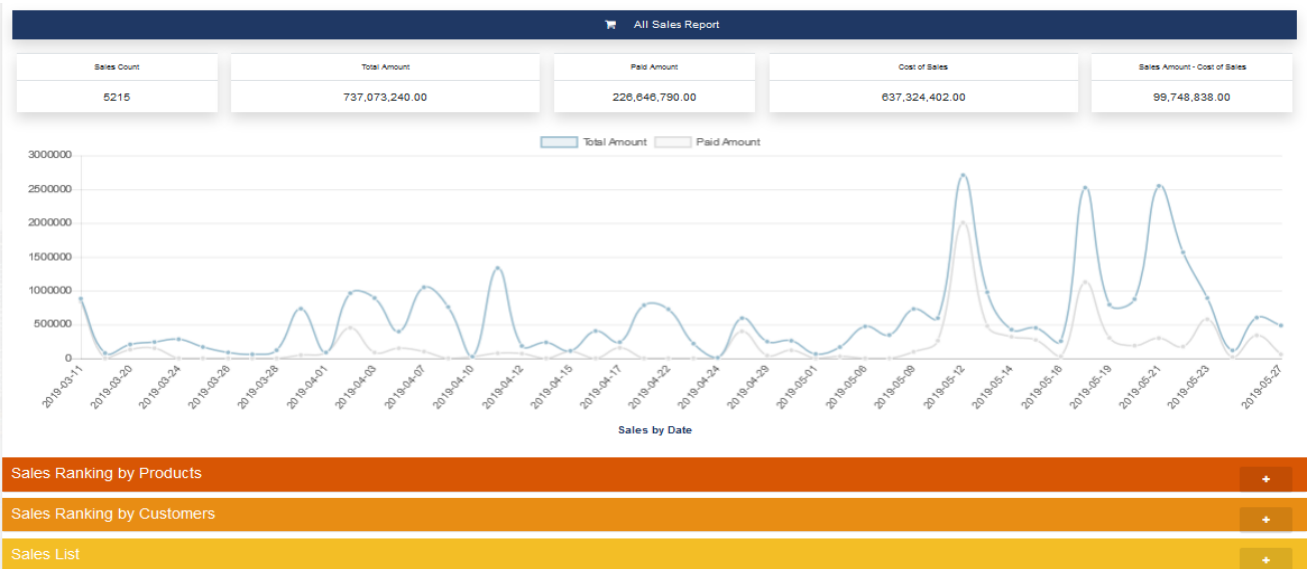

Features Overview

AiBiz helps businesses to improve efficiency and effectiveness in a number of ways. By integrating transactions, products and customers information in a single system, AiBiz unify an organization’s business reporting. The application also integrate, sales/purchase management, employee/payroll management, inventory, data security and reporting a much simpler and less error-prone process. The key features of the application includes:

- Extensive Reports, Data Analysis and Business intelligence:** AiBiz include customizable dashboards, pie charts, bar graphs and other visual representations that helps one gain business insight and have a good day-today overview of the business. The solution reporting capability provides comprehensive visibility and insight to business managers which makes intelligent business decision and projection possible. The reports includes daily report, general report, sales report, expenses report, income report, product report, customer report, etc. Being able to access synchronized reports that detail key business metrics can be extremely helpful. These metrics can alert you to changes that need to be within your business to foster more growth. The application provides means to restrict access to reports, thereby protecting valuable business information.

- Business Process Automation:** AiBiz was built to automate business processes providing business with systematic way of keeping business records. It automates sales recording, invoice/receipt generation, debt management and transaction tracking, It automatically performs trend analysis to help business take accurate decisions on the go. It provides automated means to supervise and have good oversight of business transactions across branches and to both track and monitor changes in the stock/inventory.

Features Overview

Comprehensive, Flexible and Customizable: AiBiz is one business management solution that addresses most business record needs. It is build to be flexible, enabling business to set-up the applications as per user/business requirement. Business can easily customized parts of the solution to suit their preferences. It is also highly flexible and configurable, thereby helping business to tweak the workflows and business structure without involving software changes.

- **Security, Accuracy and Speed:** In Aixept Technologies, the security of our customers data is of great importance to us. Therefore, we develop solutions (including AiBiz) with a strong focus on the security and privacy of business data both transactional and non-transactional data. We integrate state of the art cyber security technologies to ensure the security of our application data transmission and storage. AiBiz was developed with permission driven architecture which ensures that users can see, edit, & delete only the data for which they have the permissions.
- We also understand how important accuracy is in business records, aggregations, analysis and reporting, hence we ensured that all aspect of the solution provides accurate recording, retrieval and aggregation of data/report. Our security and accuracy measures was developed in a way to ensure that the speed and usability of the application is not impacted.

- **Usability and Support:** AiBiz provide a program architecture and approach that makes it easy for its users to perform tasks safely, effectively, and efficiently while enjoying the experience. The application interface is very simple and user-friendly. The usability feature of the application makes customers onboarding easy and equally requires little or no experience with computer and computer application to use the app. In addition, we provide great support to our costumers to ensure speedy response to our customers concerns and questions. The application provides a means for customers to contact the support team easily and get fast response.

- Mobile friendly and platform independent:** AiBiz solution is Cloud solution. The cloud approach makes it quite easy for users to onboard and use the application: No need for installation, database management or concerns whether the application will work on any type of device. It works on all devices through the device browser. All modern browsers are supported. The application is equally mobile friendly and presents neatly in different device screen sizes. We also have mobile application which can be installed.

Features Overview

- Search Capability and Good Documentation:** Navigating through the application is very easy. In addition to the easy of navigation, we have also a search feature that helps users to locate what they are looking for. This helps users to easily locate pages of the application that addresses their needs. Similarly, our documentation provides answers to users and shows step to step guide on how to perform various functions on the applications

- Regular updates:** We perform regular update of the application to ensure it continues to deliver great value to our customers. We gather feedbacks from users to understand necessary areas of improvement and possible features users may expect. All updates are greatly tested to ensure it meets our data security and privacy standard. In addition, we evaluate future updates to ensure it continues to meet or exceed the expectations of our current and future users.
